Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6, 21-22 and 28-33 are rejected under 35 U.S.C. 102 (e) as being anticipated by McKenzie et al (6,499,487)

Regarding claims 1, 21-22, 28-30 and 32-33, McKenzie et al disclose in figs. 9 and 12, a system for removing thrombus from blood vessels including: a catheter (110) has a lumen extending between the proximal and distal opening. The distal end of the catheter comprises a bent tip (at the distal end of the curve 110, fig. 9) with a rounded profile, and where the bent tip can be partially occluded the lumen. The catheter is adapted to be advanced along the guidewire (100). Note that the distal opening of the catheter is dimensioned so that the vascular filter (10, at best seen in fig. 12) is capable of partially retracted in the lumen of the catheter. Furthermore, the catheter has the catheter wall that curves inward to the axis of the lumen at the distal end of the catheter.

Regarding claim 6 and 31, McKenzie et al disclose the catheter comprises a rapid exchange device (see col.4, lines 40-67, and col. 5, lines 1-30).

Response to Arguments

2. Applicant's arguments filed 9/23/2004 have been fully considered but they are not persuasive. With respect to claim 1, the examiner disagrees with applicants' remarks that the McKenzie reference fails to disclose a vascular filter disposed on a guidewire. In fact, McKenzie et al disclose in fig. 9 that a filter 10 disposes or attaches on a guidewire (100). In response to applicants' arguments, regarding the vascular filter of the McKenzie reference. The claim language, "vascular filter causing emboli to become deposited in the vessel" has not been given patentable weight because it is narrative in form. In order to be given patentable weight, a functional recitation must be expressed as a "means" for performing the specified function, as set forth in 35 USC § 112, 6th paragraph, and must be supported by recitation in the claim of sufficient structure to warrant the presence of the functional language. *In re Fuller*, 1929 C.D. 172; 388 O.G. 279.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3731

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
